(54) IMAGE RECORDER

(57) Abstract:

PURPOSE: To obtain an image recorder equipped with a display device capable of displaying many kinds of states and making a user easily aware of the state by providing a screen display control means for displaying background color corresponding to the state discriminated by a state discrimination means on a display means.

CONSTITUTION: A phenomenon storage part 23 stores a phenomenon occurring in an image recording part 20. A state decision part 24 stores plural states and the phenomena corresponding to them and decides what state the phenomenon is. Then, the screen display control part 22 generates information concerning the state of the inside of the recorder and a message to the user so as to display on a display part 21. Based on the phenomenon stored in the storage part 23, especially, the background color and the screen of the message corresponding to the state decided by the decision part 24 are generated and displayed on the display part 21. Since display is performed by switching the color of the background of the display screen in accordance with the state of the recorder, the user is easily aware of abnormality occurring in the recorder in such a case.
